The Heart Rhythm Society invites you to the HEART of Denver to learn all about heart health.

May is Cardiac Arrhythmia Awareness Month in Colorado

Do you know?

- Sudden cardiac arrest (SCA) and atrial fibrillation (AFib) are the two most common types of heart rhythm disorders
- AFib affects more than 2.5 million people
- If left untreated, AFib can increase the risk of stroke fivefold
- SCA claims more than 350,000 lives each year (more than breast cancer, lung cancer, or AIDS) and often strikes without warning
- 65% of people don’t know the difference between SCA and a heart attack

Wednesday, May 8, 2013
9 a.m. to 1:30 p.m. MDT

Know Your Rhythm, Save Your Life

Skyline Park, on the corner of the 16th Street Mall and Arapahoe

Members of the public are invited to Skyline Park for an opportunity to take a FREE, online cardiovascular risk assessment and meet one-on-one with health professionals to discuss their own risk factors, as well as learn about the signs, symptoms, and treatment options for heart rhythm disorders.

In addition, the event will arm attendees with important takeaway information—including simple ways to monitor one’s heart rhythm at home—that can close the gap between early detection and the life-threatening consequences if these conditions are left untreated.

Join us for important information that can save your own life or the life of a friend or family member.

Event partner: StopAfib.org

AFib and SCA Awareness Initiatives are Supported by:

- eCardio
